

Revolution in preparing press brake processing

~One touch die holder~

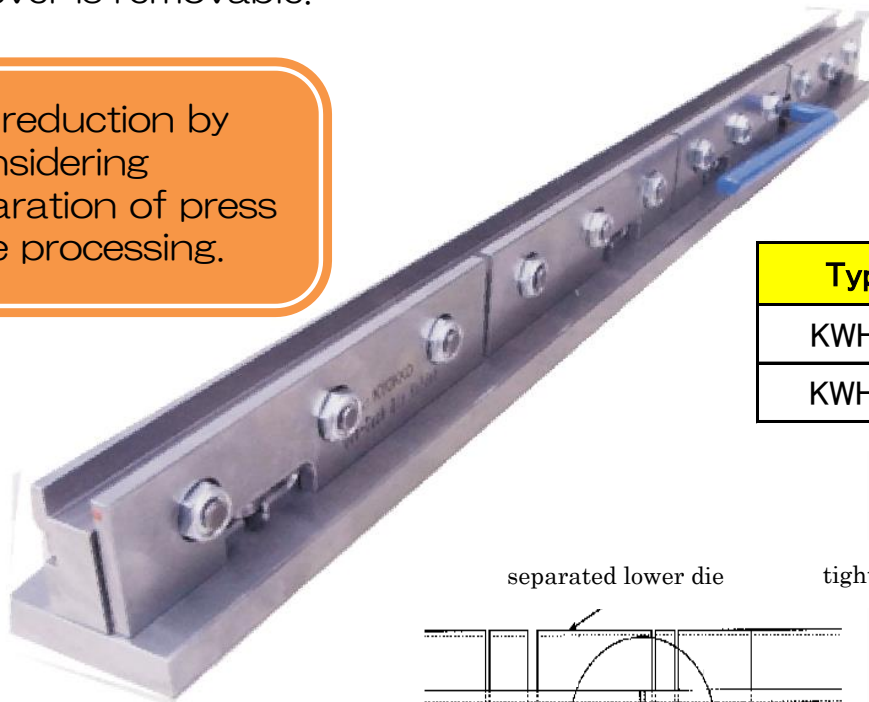

High Quality & Technology For The Future
CONIC

NEWS

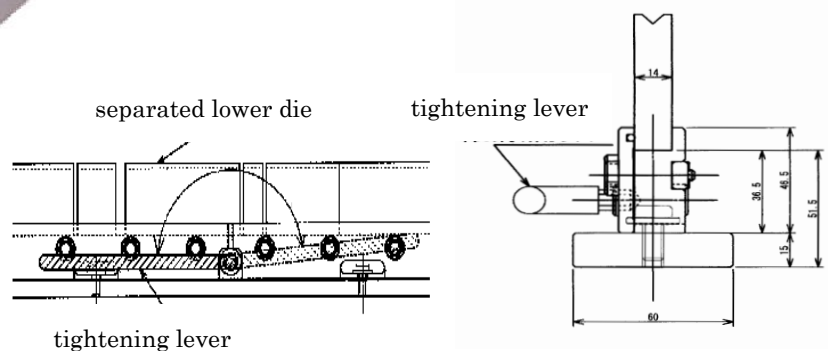

[Good points]

- ▼ You can lock all tools of the holder with only one lever.
- ▼ Regardless of length it can lock die at any position and maintains the condition after centering.
- ▼ There is no positional deviation even for short molds and it is ideal for accurate sheet metal processing.
- ▼ It can be used putting side by side with conventional holders.
- ▼ The lever is removable.

Cost reduction by
reconsidering
preparation of press
brake processing.

Type	Length
KWH-L	835mm
KWH-S	415mm

We have a large assortment of
tools for press brake
(standard/special).
